25X1A

are presently at [REDACTED] and have enough spares packaged with them for one year's heavy stand-by operation. Replacement spares requirements were determined in conjunction with the Office of Communications. Such spares will not be stocked overseas, but will be shipped from the ZI as replacements for parts used.

j. Standardization of Headsets: (new and completed item)

A meeting was held with representatives of the Office of Communications, TSS, Catalog Branch, and Stock Management Section to initiate action regarding the standardization of headsets, with particular attention being given to cord termination data. Firm requirements were obtained from TSS with the Office of Communications committed to supply the requirements at a later date. Firm identification is being accomplished by the Catalog Branch. It is anticipated that some modification must be made to the 'on hand' stock before the program is completed.

*in quantity  
or  
quality*

k. Foreign Manufactured Items: (new and completed item)

A stock level review is being conducted of foreign manufactured items in all material groups and replenishment requisitions will be forwarded to Procurement Division where appropriate.

4. MAJOR PROBLEMS:

None

*Not None*

5. MAJOR OBJECTIVES:

Current status of Division objectives reported to Technical Review and Policy Staff on 4 February.
